**Information****XTC's with 2C-B****Berne (DIB)****29.6.22**

## Substance details

**2C-B\*HCl****14.6 mg**

## Details of the substance tested

Thickness

**3.8 mm**

Length x width

**11.1 x 6.3 mm**

Weight

**180.4 mg**

Colour

**Pink**

Fracture groove

**No**

## Relevant substance(s)

**2C-B -****2C-I**

## Risk assessment

2C-B is a synthetic, hallucinogenic mescaline derivative that is psychoactive even in small quantities. As 2C-B is relatively difficult to dose optimally (2 mg more or less already make a big difference), there is a risk of a bad trip and unpleasant physical effects. Doses above 25 mg are only recommended for experienced users.

# Alert level

 Information Caution Alerts

## Safer Use

### Testing

Have your substances tested in a drug check.

### Set & Setting

2C-B and other 2C substances have a very setting-dependent effect and are only suitable for parties to a limited extent. Use only in places where you feel comfortable and avoid mixed use.

### Safer Sniffing & Dose

Caution, 2C-B burns painfully in the nose! When sniffing, follow the safer-sniffing rules and dose carefully. 2C-B and other 2C substances are effective even in the smallest doses.

### Disclaimer

If you are in possession of a substance that does not appear on this page, this in no way means that it contains the expected ingredient or that it should be safe. The warnings we publish only refer to the substances listed in our Drug Checking offers, these substances pose a high risk of consumption and should not be consumed. A substance may have the same visual appearance (shape, size, colour, etc.) and yet have different ingredients or a different composition. There is no drug use without risk! Only a complete renunciation of drugs is risk-free! If you still decide to use drugs, you should at least follow the safer use rules.
